

It has been brought to my attention that the Consumer Bankers Association has challenged Indiana's Telephone Privacy law and to impose the federal "established business relationship" exemption. Please, please, do not allow this to happen. I have a disability that requires me to rest throughout the day. I have dependents and an aged father with heart disease so I cannot turn off the phone. Not having the phone ring constantly because of our law has helped my health. Please don't allow the disruptions to start back up. Think of the others with young children, changing diapers, feeding them, napping, etc., and our aged population who are so easily confused. Thank you for your consideration into this matter.
